

Children's Outpatient Services

STRENGTHENING A CHILD'S FOUNDATION FOR LIFE.

We help children, adolescents and families develop skills and coping strategies they can use for a lifetime. Wheeler's Children's Outpatient Services address behavioral health challenges related to childhood, adolescence, working with clients and caregivers to establish treatment goals specifically related to individualized needs. Clinicians on our team deliver gender-specific, trauma-informed and a person-centered approach to care through individual and family therapy, targeted group therapy, medication management and integrated care coordination with all identified resources for the child. Wheeler provides state-of-the-art, evidence-based practices such as Trauma Focused Cognitive Behavioral Therapy (TF-CBT) and Dialectical Behavior Therapy (DBT) and specialized treatment for individuals facing challenges with anxiety, depression, substance abuse, or who may be victims of sexual abuse, or exhibit problem sexual behaviors and self-harming behaviors.

TREATMENT HELPS INDIVIDUALS AND FAMILIES:

- Break the stigma of mental health challenges
- Stop or reduce substance abuse
- Find hope
- Enhance skills to cope with anxiety and depression
- Improve family relationships
- Improve school functioning
- Prevent further involvement with the court or child protective services
