Parents and Guardians,

This letter is to inform you of a change to the Bristol Board of Education policy regarding middle school common assessments. In the past, our students have been given a mid-term and final exam in each of their core classes. CHMS operates on a trimester system with three distinct grading periods. In order to better align our exams with our school calendar, students will be taking three separate assessments at the end of each trimester. These grades will be reflected on your student's report card at the end of each trimester in a separate column. Please take time to read the new policy below and contact the school if you have any questions. This new policy will update the Common Assessment portion of your CHMS Student Handbook.

COMMON ASSESSMENTS

Common assessments in all core subjects will be administered three times during the school year; one during each trimester. Each common assessment will count towards 3% of a grade 6 student's grade, 4% of a grade 7 student's grade, and 5% of a grade 8 student's grade. Common assessments are comprehensive examinations of curriculum and student learning over an extended period of time. Each common assessment is the identical assessment that is given at each middle school at the same time of the school year.
